

```
module load <program>
```

```
<program>
```

```
module load xds
```

```
xds
```

```
Module load ccp4
```

```
ccp4i
```

```
module load phenix
```

```
phenix
```

```
module load chimera
```

```
chimera
```

```
module load relion
```

```
relion
```

List available programs

```
module avail
```

List loaded programs

```
module list
```

Show info fore program e.g. path to program

```
module show <program>
```

Example

```
$module load atsas
```

```
$ module show atsas
```

```
/home/tp# module show atsas
```

```
-----  
/usr/local/modules/modulefiles/atsas/2.8.3-1:
```

```
module-whatis      Setup atsas 2.8.3-1
```

```
conflict          atsas
```

```
prepend-path      PATH /usr/local/modules/atsas/2.8.3-1/bin  
-----
```
